

Auto Rotate VPN Server Every X amount of Time Deployed

- M Mark
- **Forum name:** #Suggestion

Hello Team,

Please consider adding a function that will auto-rotate the VPN server (your public IP) every X amount of time. This will provide an even higher level of anonymity to the world.

Examples:

Rotate to a new server in giving location or country every 24 hours

Pick 10 severs to hope back and forth on every 30 mins
