

## Geo-Located Servers We Offer

Kaneesha D. - 2021-03-16 - Servers

As of June of 2020, Private Internet Access began rolling out geo-located servers across 35 different locations/regions. In the server view, when these servers are enabled, you will see an icon that resembles a globe, noting that each of these servers is not physically located in the region where the exit node is located.

The implementation of geo-located servers has provided us an opportunity to offer VPN services in countries where service may not have been previously available due to restrictions, government legislation, or a lack of secure server providers. The following servers are currently or in the process of being geo-located:

- Algiers, Algeria (Amsterdam)
- Andorra (Amsterdam)
- Yerevan, Armenia (Amsterdam)
- Minsk, Belarus (Vilnius)
- São Paulo, Brazil (Miami)
- Phnom Penh, Cambodia (Singapore)
- Nicosia, Cyprus (Amsterdam)
- Cairo, Egypt (Bucharest)
- Tbilisi, Georgia (Amsterdam)
- Nuuk, Greenland (Amsterdam)
- Tehran, Iran (Amsterdam)
- Douglas, Isle of Man (Amsterdam)
- Astana, Kazakhstan (Amsterdam)

- Vaduz, Liechtenstein (Amsterdam)
- Valletta, Malta (Amsterdam)
- Mexico City, Mexico (Miami)
- Monaco (Amsterdam)
- Podgorica, Montenegro (Amsterdam)
- Rabat, Morocco (Amsterdam)
- Lagos, Nigeria (Amsterdam)
- Panama City, Panama (Amsterdam)
- Manila, Philippines (Singapore)
- Doha, Qatar (Amsterdam)
- Saint Petersburg, Russia (Tallinn)
- Riyadh, Saudi Arabia (Amsterdam)
- Colombo, Sri Lanka (Amsterdam)
- Taipei, Taiwan (Singapore)
- Dubai, UAE (Amsterdam)
- Caracas, Venezuela (Amsterdam)
- Hanoi, Vietnam (Singapore)

As always, should you have any questions regarding geo-located servers or questions regarding these servers, please let us know.
