Security Best Practices - Part 5: Testing Your Security

Travis - 2021-03-16 - Best Security Practices

Part 5: Testing Your Security

TL/DR: Use the following tests to ensure your privacy and security

Whilst we hope you've opted to heed our advice in using or following one or all of our five suggestions for protecting your day-to-day internet activity. The only best way you can be sure about your internet security is through testing and continuing to be diligent.

You will find the following tests useful for determining your online privacy and security are configured correctly or else your digital identity could be compromised.

Test	URL
DNS Leak	www.dnsleak.com
IP Leak (IPv6)	www.ipv6leak.com
Speed Test	www.speedtest.net
WebRTC	diafygi.github.io/webrtc-ips
