

What Operating Systems Are Supported?

Travis - 2023-12-04 - Frequently Asked Questions

Private Internet Access apps are compatible with a wide variety of operating systems and devices.

To find the most up-to-date list of supported OSs and their respective download links, please visit our [Downloads page](#).

Desktop:

- Windows 8.1, 10, and 11 (32 or 64 bit)
- macOS (64-bit only) 11.0 or newer
- Linux (64-bit and desktop versions only): Ubuntu (LTS only) 18.04 or newer, Mint 19 or newer, Arch, Fedora, and Debian

Mobile:

- Android 5.1 or newer (mobile devices only)
- iOS 12.1 or newer (only 64-bit devices)

Browser Extensions:

- Chrome v48 or newer
- Firefox v57 or newer
- Opera v52 or newer

Note: Private Internet Access cannot offer technical support for depreciated operating systems. This is due to potential security issues that could be present and which are no longer addressed by their respective manufacturer. Private Internet Access will continue to provide the most secure and private environment possible for our users. We are unable to guarantee that subsequent releases will work with unsupported operating systems. Customers may benefit from dramatically enhanced security, privacy, and updates by migrating to newer operating systems whenever possible.
