## Where can I see if a particular server is currently up or down?

Kaneesha D. - 2021-02-11 - Servers

Our Network Page will display the list of all the countries that we currently have servers in, including our geo-located servers, indicated with a “geo-located” tag.

### Our Mission

Our commitment to you is to maintain the highest standards of privacy, while simultaneously providing the most solid, top speed VPN network. We always stand true to our commitments. Additionally, we believe that customer support should be equally as important.

Welcome to Private Internet Access, the leading [VPN Service](#) provider.

### VPN Tunnel Network

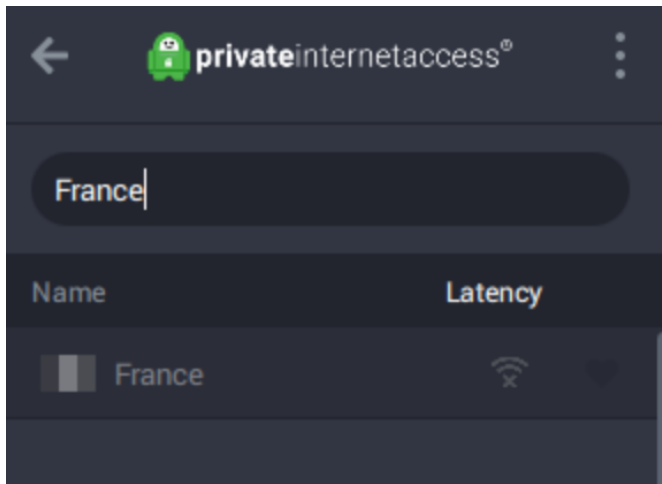

29,011 VPN and Proxy servers in 99 locations across 77 countries. All servers supports WireGuard®.

PIA only uses bare-metal servers for our VPN network for enhanced security and performance.

 <p>Turkey <span>GEO-LOCATED</span> 1 Location • 24 Servers 24 VPN</p>	 <p>Viet Nam <span>GEO-LOCATED</span> 1 Location • 24 Servers 24 VPN</p>	 <p>Algeria <span>GEO-LOCATED</span> 1 Location • 23 Servers 23 VPN</p>
---	---	---

To see if a particular server is experiencing an outage, the server will be greyed out within the application and an inactive Wi-Fi symbol will appear under the latency section as pictured below.

For more information on our servers please visit our [Network](#) page for the latest information and our newly added servers or contact our support team for additional questions [here](#).
