## Why do the PIA tray icon colors look different?

Travis - 2021-05-25 - Application & Features

The colors used by the PIA application displaying the connection status have been updated with the latest UI rehaul of the PIA App (v1.0 and later). The exact colors used by our application are described in the tray icon article [here](#).

You can confirm if the VPN is connected by visiting our [What's my IP page](#) to ensure that your location and IP address are not your real ones.
