Android Application - 3.11.2 Release

2021-05-11 - Devin S - Announcements

With hard work from our Mobile Development Team, we've been gifted a new version of the Android VPN client (3.11.2)! In this release, measures were put in place to combat the login issue that was reported midway through last week. This will be rolled out to our users in a phased release that will occur over the upcoming days.

When this version becomes available, please reach out to us if previous issues persist or if you run into any trouble using the client. Our CS team would be more than happy to help!
