

Desktop Client - 3.1.0 Release

2021-10-20 - Devin S - Announcements

We are pleased to announce the latest release of our Desktop client (3.1.0)! Included in this release, you'll find new additions to the 'What's New' section of the application, with one of the updates highlighting the benefits of the use of Dedicated IPs! You can see the changes that were made in this update via the [changelog](#) on our website, in addition to the listed points below:

- Added support for Wayland display server on Linux
- Improved OpenVPN TCP timeouts when the server isn't reachable
- Improved macOS Split Tunnel to protect against looping packets
- Fixed an issue where client might not automatically start on macOS Big Sur
- Updated "What's new" content
- Build times were improved with significant internal refactoring
- User will be shown login screen when retry login fails.

As always, if you run into any issues installing the update or using our service, our Support Team would be more than happy to assist with addressing your needs! Whether through our 24/7 [Live Chat Support](#) or our [Ticketing system](#), we want to ensure anonymity for all users seeking it!
