

February 20, 2020 - Desktop v1.8 Release

2020-02-20 - Michael B - Announcements

We are happy to announce that our Desktop team has a new version of our application that includes some important updates to OpenVPN, QT and our Windows Tap Adapter. You can find this update's changelog here:

- Split tunnel apps can be configured to use the VPN only or to bypass the VPN
- The default behavior can be set to "Bypass VPN" to use the VPN only for specific apps
- Fixed TCP localhost connections for split tunnel apps on Windows
- Fixed split tunnel for Mac apps that bind to specific ports
- Fixed focus behavior on Mac when closing windows with the keyboard
- Updated Qt to 5.12.6
- Updated OpenVPN to 2.4.8
- Updated OpenSSL to 1.1.1d
- Updated TAP adapter to 9.24.2 on Windows

If you would like more information regarding split-tunneling and its functionality (including the inverse split-tunnel feature), please refer to the following guide:
