2020-11-04 - Devin S - Announcements

Within our Help Center we've created an environment where current users, and people interested in our service can provide their feedback and suggestions for possible future implementations! If there is a feature that you wish to see, a server location you would like to have added, or anything that will improve your overall VPN experience, please let us know. We value your input and want to ensure PIA fits your vision for Privacy and Security, not only our own!
