Privacy & Security - PIA Antivirus

2021-08-18 - Devin S - Announcements

It's finally here! We are proud to announce the release of our very own Antivirus software! With hard work from our development team, we are now able to provide PIA users with both Privacy and Security while using our service! This being available **exclusively sold as a [subscription bundle](#)** at this time, you can purchase the Antivirus software, and a Dedicated IP for an additional $10 on top of your monthly rate!

The new PIA Antivirus is currently only available for Windows users, as we have plans to expand to various operating systems in the future. To maximize the capabilities of the Antivirus, you'll find the system specifications needed to run the software in the following support [article](#). Additionally, you may download the AV application from our website, [here](#).

At any time, if you run into issues using the Antivirus software, reach out to us [directly](#), and we will relay the information to our development team for an investigation. Although troubleshooting may currently not be apparent, we will happily assist users with installations and the understanding of the features available within the Antivirus. If you currently have a subscription with us and would like to take advantage of this offer, please reach out to one of our [support agents](#) and we will be more than happy to help get the ball rolling!
