Website Updates and Improvements

2021-06-07 - Michael B - Announcements

As we grow as a company and improve the customer experience, we are proud to announce the rollout of our new and improved website. Through the tremendous hard-work of the Private Internet Access team, we have created a website which is a reflection of the positive momentum that has been built upon with other feature improvements such as our [Next Generation Network](#), [Wireguard](#) and support for [Dedicated IPs](#).

Should you find any issues with the website such as invalid links, improper content or any issue that may need to be resolved, please, as always, do not hesitate to reach out to our Customer Support Department via chat or ticket. This, of course, is applicable to any issue you may experience with the VPN as well.

Thanks so much for your continued patience and support.
